Pet Talk: Preventing Diabetes in Cats

Diabetes mellitus (also called sugar diabetes) is becoming more common in our society. Genetics and lifestyle play an important role in humans; however numerous processes can contribute to the development of this disease. In addition to the rise of human diabetes cases, veterinarians are also seeing an increase in the prevalence of diabetes in cats.

Diabetes mellitus is characterized by an absolute lack or relative deficiency of insulin. The two most common forms of diabetes in people are Type 1 and Type 2, and most diabetic cats have a form that mimics human Type 2 diabetes. During digestion, nutrients from the cat's diet are broken down into smaller components—like glucose—that the body can use as energy. Insulin, a hormone responsible for the regulation of glucose in the bloodstream, is produced by the pancreas. Glucose can only enter the cells to be used as energy in the presence of insulin. If there isn't enough insulin, the body begins to break down fat and protein, leading to increased appetite and weight loss.

Dr. Audrey Cook, associate professor at the Texas A&M College of Veterinary Medicine & Biomedical Sciences, explained how diabetes can affect feline patients. "With this disorder,

WBU, WTAMU Enter Into Agreement

(continued from Page 8)

Dean of Wayland's School of Mathematics and Sciences Dr. Scott Franklin said this degree program has been in the works for several years. He and Dr. Jackson have been friends since grade school in Canadian. When Dr. Jackson joined the faculty at WT, they began discussing the possibilities. With the help of Dr. Stan Demeritt and Dr. William Hahn at Wayland and other faculty and administrators at WT, the universities were able to reach an agreement that maximizes transfer credits.

Wayland Executive Vice President and Provost Dr. Bobby Hall gave credit to the work of both university staffs and said this agreement, while mutually beneficial to the universities, is a benefit to the students, and having two degrees will give them a competitive edge in the marketplace.

I don't think there has ever been a time in the three decades that I have been in higher education that collaboration and cooperation are more important, and that collaboration and cooperation be focused on what is good for students," Hall said. "One thing that I know about our friends in Canyon is that they are just like us. Their interest is in their students more than anything.

"We feel really good about the opportunity to say that this transition makes sense from a Wayland experience and Wayland culture to West Texas A&M experience and West Texas A&M culture."

Some writings from the late Andy Rooney of 60 Minutes:

- I've learned that the best classroom in the world is at the feet of an elderly person.
- I've learned that we should be glad that God doesn't give us everything we ask for.
- I've learned that sometimes all a person needs is a hand to hold and a heart to understand.
- I've learned that you should never say no to a gift from a child.
